

Q Line Shelving • Bulk Storage Shelving Heavy Duty Reinforced Shelving

SYSTEMS FOR SUCCESS

Q Line Shelving

Q Line Shelving is designed for those storage applications that demand strength and versatility. Its solid Box Beam construction and heavy duty steel shelves (available in both 20 and 22 gauge) combine to increase load-bearing capacity up to 1,000 pounds. Q line is available in Open and Closed style units with a wide range of accessories and options. It's also easily adaptable to fit mezzanine systems.

Mezzanine Capabilities

Units can be configured into multi-level applications.

Three Styles

Select from open, closed or bin style shelving.

Heavy Duty Shelves

Shelf corners are fully lapped and welded in two places for extra strength. Combined with sides that incorporate triple-bend construction, shelves can support up to 1,000 pounds.

Label Holders

Accommodates 1" high labels for easy parts identification.

Easy Adjustability

Shelves can be adjusted quickly and easily in 1" increments to make maximum use of vertical space.

Back and Side Panels

Prevents materials from falling off, as well as protecting items from dust and contaminants.

Easy Alignment

Upright posts feature a square hole every third hole for easy shelf alignment.

Sliding Dividers

Can be placed anywhere on a shelf instantly. Built-in label holder for additional parts identification.

Three Post Styles

Offset Angle Posts

Most versatile post for individual units.

Standard Beaded Posts

Can be used as a common front post for long runs of shelving. Small profile provides unobstructed shelf access.

Heavy Beaded Posts

For very heavy loads. Can be used as a common front post for long runs of shelving.

All posts are made of 14-gauge rolled steel.

Q Line Quality and Versatility

Q line shelving offers a versatile system of open, closed and bin style units for hundreds of storage applications. Q line boasts a wide variety of accessories and options to suit your office or factory requirements.

Shelving units can be constructed in three standard widths, five depths, and nine heights. Units can be used individually or joined together into a system.

Superior Strength

Q Line shelves use a structural box formation on the front and rear flanges. The face of the box is ribbed and the flange is welded every three inches. The shelf ends have three bends (competing shelves use only two) for added front to back strength. The net result is the strongest shelf in its class, with a load capacity up to 1,000 pounds!

Boltless Attachment

13-gauge compression clips make adding shelves a snap. Just clip on. No bolts or tools required.

Open Style

Great for storing packaged items, containers and tools. Allows easy access to items.

Closed Style

Closed style helps prevent items from accidentally falling off shelves. Ideal for storing small or fragile loose items.

Closed Bin Style

Our bin system provides needed organization and segregation for small items with the 16 sizes of available shelf dividers.

SYSTEMS FOR SUCCESS

Q Line Shelving Accessories

Hinged Door

Hinged double door attaches to angle posts. Locking handle and three-point locking system is ideal for items requiring security. Door also offers protection against dust.

Back Panel and Side Panel

Optional back and side panels keep items from falling off shelves.

High Density Modular Drawer

Heavy-duty construction and industrial strength full ball-bearing suspensions make this drawer ideal for your heaviest storage needs. Removable partitions and dividers are adjustable for custom organization.

Shelf Boxes

A handy place to store small, loose items. One adjustable divider comes standard with each box.

Bins

Numerous bin configurations are possible with 16 sizes of shelf dividers to choose from.

Shelf Divider

Dividers require no mounting hardware and can be added, moved or removed instantly.

Ledge Units

The Ledge Unit adds 12" of shelf depth to four lower shelves. Accommodates large or long items, so you won't need to buy a separate unit. Strong 750 lb. capacity per shelf means it can handle some of the heaviest loads. Nominal dimensions: 36"w x 12"d x 39"h.

Ledge Unit Door

Hinged double door with three-point locking system provides security for items stored in the ledge unit. Also helps protect against dust.

Heavy Duty Reinforced Shelving

For extra heavy-duty storage, Reinforced Shelving offers a reinforced shelf capacity of 2,000 lbs. Constructed of 16-gauge steel shelves and 14-gauge posts and supports, the unit's superior strength makes it perfect for storing dies, motors, jigs, fixtures and other heavy materials. Braceless construction allows easy access from all four sides, and the smooth steel surface makes placing and removing items much easier than on wood or wire shelves - simply slide items on and off. A simple design, uncommon for a unit built to withstand such loads, makes it quick and easy to assemble or rearrange.

Designed to Handle Your Heaviest Loads

Unique combination of shelf supports with cross beam supports creates a super-reinforced unit and prevents deformity even under heavy loads.

Superior Strength

Our rivet attachments offer superior strength to shelving attached by nuts and bolts. And assembly is far easier than nuts and bolts, too.

SYSTEMS FOR SUCCESS

Bulk Storage Shelving

Here's the most economical way to store bulky items.

Bulk Storage shelving allows clear and convenient access from front or rear. Designed to handle capacities of 10,000 pounds per upright set. Uprights are pre-welded for strength and fast assembly. Beams incorporate a unique tapered finger design attachment that locks beams safely on to uprights.

Assembles Easily

Bulk storage units go together fast and easy – beams simply slide into place. Assembly takes less than half the time of most other shelving products.

Wide Range of Sizes

Choose from six heights, six depths and three widths: 48", 72" and 96".

Extra Strength

Rolled formed steel box beams provide added strength at front and rear of shelf edges.

Three Types of Decking

Choose sturdy wire, wood or corrugated decking, depending upon the application. You may also choose to use our Q Line Shelving, as shown on opposite page.

Preassembled Uprights

Welded uprights make installation fast and convenient.

Economical

Adjacent units share a common upright for greater economy.

Box Beam & Brace

Box Beam is used to hold wire decking and is reinforced with a box beam brace.

Box Beam Plywood Holder

Converts a Box Beam to hold particleboard decking.

Plywood Beam & Brace

Plywood Beam is used to hold wood decking or corrugated steel decking and is reinforced with a plywood support angle.

Your Choice of Decking

◀ Corrugated Decking

Featuring a rigid surface, with minimal deflection under load, corrugated decking provides a sturdy option for general purpose storage. Its solid surface allows you to store both small and large items. The smooth finish allows for easy sliding of stored items on and off the shelving. Flame-retardant, attractive corrugated shelves are light and easy to install.

Wood Decking

For heavy-duty applications, economical wood decking is a great choice.

Wire Decking

Provides better air flow and visibility of stored items. Meets factory Mutual fire codes.

Easy Installation

Beams connect to uprights with special tapered finger design attachment. Each beam can be adjusted in 2" increments for maximum use of vertical space.

Built-in Flexibility

When you need more height than the standard Q Line upright will safely hold, use Q Line shelves on the bulk storage uprights. Available in 18", 24", 30" and 36" depths only. Sway braces tie the left and right sides together. This flexibility provides a solution for all your high-rise applications.

SYSTEMS FOR SUCCESS

All Q Line and Bulk Storage Shelving is powder painted with a tough, baked enamel finish to assure years of lasting beauty. Choose from three standard finishes.

Medium Grey
(Stock Color)

Light Grey

Sand
