Media Storage Racks

DASCO Media Storage Racks are available 54" & 84" high as well as SINGLE or DOUBLE sided. Shelves are adjustable in 1" increments and uniquely angled to hold most computer media.

How to calculate the capacity of your rack

1. Use the Media Capacity Chart below for the Space required for your media
2. Divide the height of the rack by the Space required for your media= Number of shelves needed.
3. Then multiply the number of shelves by the Capacity per shelf = Total Capacity of rack.

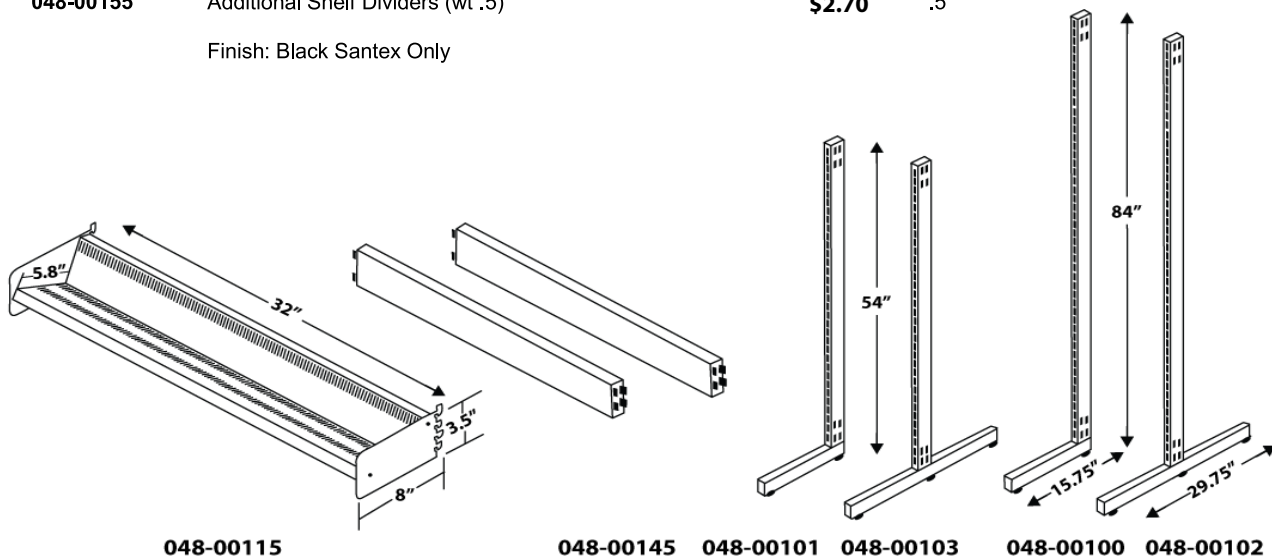

Example for LTO Storage

Space required: 6" per shelf
 Rack Type: 84" high, Single Sided
 $84 \div 6 = 14$ shelves
 14×30 (LTO per shelf) = 420 LTO per rack

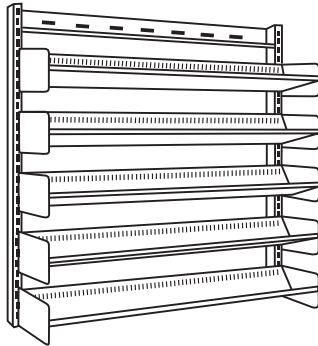

Media	Capacity Per Shelf	Space Required
