A VITAL PURCHASE FOR
VITAL ELECTRONIC MEDIA.

The FireKing® MediaVault™

The FireKing® MediaVault™ provides security, convenience – and peace of mind.

The MediaVault™ from FireKing® – the compact, affordable, stand-alone storage safe that is designed to protect heat-sensitive valuables, including data and information storage media. Whether it's microfiche, photographs or computer data on virtually any standard media (see chart on back), the MediaVault will protect it from dust and fires up to 1700 ° F.

The MediaVault is the only compact and affordable media safe of its size designed to meet Underwriters Laboratories® (UL) Class 125, one-hour specification for insulated record protection equipment. This specification ensures that the interior temperature of the storage device does not exceed 125 ° F when exposed to a fire of 1700 ° F for a period of one hour and during that time the interior relative humidity does not exceed 85%RH.

The MediaVault is also equipped with a key lock for added security and peace of mind.
