Meets HIPAA Regulations

SYSTEMS FOR SUCCESS

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) has placed even greater demands on healthcare providers to safeguard patient information. In fact, the violation of a patient's privacy can result in a substantial penalty.

We can help your organization meet HIPAA regulations through a wide range of proven filing and storage products. Each meets HIPAA regulations for keeping medical records in locked cabinets yet allows your organization to operate efficiently.

Choose from a variety of storage and shelving equipment fitted with lockable doors to keep contents secure. If you prefer to keep your current investment in shelving, We also offers door options that can be retrofitted to almost any shelving product.

Tambour Door Option
